

After loading UNCLE SAM'S JIGSAW do not stop your tape recorder. The program starts automatically and proceeds to read necessary shape tables from the tape. Wait until the forth "beep" when your are presented with player options before stopping your tape recorder.

UNCLE SAM'S JIGSAW is an educational geography game featuring a detailed drawing of the United States. Each of the 48 continental United States must be recognized by its shape and location in a high resolution map of the U.S. The student gets two points for each state he names from shape alone, one point when recogniton requires shape and location. Education in its most enjoyable form .
